ABOUT BIND 4.0

BIND 4.0 Open Innovation Platform is a public-private initiative funded by the Basque Government and the Department of Economic Development Sustainability and Environment through the SPRI Group. The Open Innovation Platform facilitates the development of transformative Industry 4.0 projects while providing unparalleled business support due to the region's strategic long term commitment to Industry and Innovation. The initiative, launched in 2016, connects innovative startups worldwide with Industry leading companies and helps implement mutually beneficial Startup-Corporate collaborations. With 8 years of successful stories and 300 Open Innovation Projects developed it is the Largest Open Innovation Catalyst.

Connecting Industry 4.0 Startups with Leading Industry 4.0 Corporates

The BIND 4.0 Platform offers multiple startup programs which match innovative technologies with paid venture clients to develop groundbreaking Industry 4.0 projects. BIND 4.0 is committed to boosting innovation and enhancing the digital transformation of corporate companies, government organizations and SMEs through the development of Open Innovation projects. We are equally devoted to strengthening the entrepreneurial ecosystem, attracting innovative startups from around the world with solutions applicable to a wide variety of sectors. BIND 4.0 accelerates the growth of technology startups with support services and business opportunities and by connecting them with one or more clients to develop real and paid projects.

A one of a kind public-private initiative, the BIND 4.0 Platform has facilitated the development of 300 Industry 4.0 projects and impacted 200 Tech startups and scale ups since 2017. Thanks to our positive reputation and impact figures, each year the number of well established companies that choose to partner with BIND 4.0 increases. We currently have a total of 100 Corporate Venture Clients, Government Organizations and SMEs participating across three programs.

BIND 4.0 has made a positive impact on the local business environment for our unmatched startup acceleration support, training and immersion in industry activities, in addition to facilitating collaborative projects with a Corporate Venture Client. The Venture Client approach means that participating startups will have at least one paid pilot project with a well-respected company while retaining ownership and without exchange of equity.

Our win-win programs benefit startups and the corporate clients, on the one hand we help boost the growth of tech startups through real, paid projects with reference customers. On the other hand, corporate companies discover new technologies and quickly test and develop groundbreaking solutions to enhance their digital transformation journey.

As interest in the BIND 4.0 Platform expands, so do the opportunities for international startups and innovative Basque companies. We are proud to offer three startup programs based on facilitating Industry 4.0 Startup-Corporate collaborations.

BIND 4.0 Provides Many Pathways to Success

BIND 4.0 Open Innovation & Acceleration Program

Accepting Startup Applications in July

The BIND 4.0 Open Innovation and Acceleration Program offers startups a unique opportunity to both receive impactful acceleration support in addition to developing a paid project with one or more clients. Dynamic startup teams reach 70 well-respected Corporate Venture Clients looking for external solutions to their internal digital transformation needs. Venture Clients invest in startups by contracting them for real use case projects and acting as reference clients while startups gain traction in the marketplace. While implementing disruptive technologies, participating startups get 24 weeks of active acceleration, high impact workshops, a dedicated expert mentor, regular networking events, meetings with Corporate Venture Clients, access to investors and public funding, services from our technology partners and unparalleled business support.

BIND 4.0 SME Connection

Accepting Startup Applications in November

The BIND 4.0 SME Connection offers multiple benefits to startups and scale ups including positioning in the marketplace, product validation from medium size businesses, and reference clients within the Basque Industrial Ecosystem. This initiative has 24 SMEs who are active members of 6 Basque Business and Cluster Management Organizations. The members put forward a series of industry specific challenges that directly affect their businesses and seek to hire the best solutions presented. Startups and scale ups respond to the sector-led challenges by proposing solutions and developing innovative projects during a 32-week cycle.

BIND 4.0 GovTech

Accepting Startup Applications in January

Focused on innovation in the public sector, startups reach 6 Government Organizations from the Basque Country seeking groundbreaking technologies. Members of BIND 4.0 GovTech identify individual technological challenges they are facing and seek solutions that enhance the accessibility, efficiency, and sustainability of public services. This 32-week initiative presents innovative startups and scale ups with the opportunity to work on real use case projects in the public sector and access training to promote the success of collaborative projects with government agencies. As with all 3 of the BIND 4.0 startup programs, there is no fee to participate nor apply, companies retain their intellectual property and no equity is taken.

Connect with Clients of Reference in the Basque Industry 4.0 Hub

Technologies In Demand

The main technologies our partners are currently focused on developing are: collaborative robotics, artificial intelligence, indoor positioning, big data analytics, blockchain, IoT / IIoT, machine learning, cybersecurity, cleantech, wearables, bio-based solutions, drones, medical devices, augmented or virtual reality, additive manufacturing, digital twin, smart energy & storage, e-mobility, new materials, nanotechnology, circular economy, quantum computing, and artificial or computer vision.

BIND 4.0 is seeking technology startups with products or solutions with potential application in these verticals: Intelligent Industry, Clean Energy & Sustainability, Health, Food & Beverage, Construction, Environment, Furniture & Design, Locomotive, Automotive and the public sector. Startups worldwide, completing the configuration of their solutions or those already in the market are welcome to apply.

Startup Benefits

Thanks to the unique Venture-Client approach, participating startups have at least one paid Industry 4.0 project with well-respected companies, plus unmatched support services. Because we know the needs of our 100 Corporate Partners, SMEs and Government Organizations, our Global Startup Network has the opportunity to solve real industry challenges and use cases. Thus, BIND 4.0 is a catalyst for open innovation and mutually beneficial business opportunities.

With an average amount of €42,000, the Industry 4.0 pilot project is a paid contract with one or more industry leading companies and contracts have been as high as €150,000. The venture-client invests in the startup by buying the product or solution for an open innovation pilot project and in-turn acts as a reference client and in some cases providing proof of concept. Our “zero equity” platform is unique in that startups maintain intellectual property, no equity is exchanged, and there is no fee for startup participation.

In addition to the paid contracts to test, fine tune and implement startup solutions, there are excellent support services provided by BIND 4.0. The Acceleration Program includes executive training, workspaces, 1:1 business mentoring, support from our technological partners, networking with corporates, industry events, Demo Day, plus access to financial aid and investors in the BIND 4.0 Venture Club.

The executive education and expert mentoring provided helps Founders establish long term strategies for success. Not to mention the numerous networking activities that are carried out with the participating companies, startups and the public to facilitate the immersion of disruptive startups in the Basque industrial ecosystem, one of the most vibrant and growing innovation hubs in Europe.

Corporate Services

Collaborating Corporate Clients participating in BIND 4.0 have access to an agile Open Innovation Platform where they discover, meet, and contract the best startups and technologies under the Venture Client approach. Often large companies are aware of the digitization challenges they face but not necessarily the solutions. BIND 4.0 introduces them to new technologies and innovation to test and see what works for them. Our platform allows corporations to be early adopters of the most innovative technologies developed by startups and to quickly incorporate competitive, state-of-the-art solutions into their processes.

The startup scouting and targeted training performed to meet specific goals and address any challenges in their digital transformation and path to innovation, are some of the biggest benefits of BIND 4.0. The Open Innovation Platform provides an identification and analysis of the latest technologies and business solutions in the areas of most interest to our Partners. Additionally, BIND 4.0 helps corporate clients define their innovation challenges or use-cases each year. Basque based companies can pursue individual innovation projects or identify group challenges, whose solutions would positively impact the industry as a whole. What's more, BIND 4.0 offers training and workshops to help bridge the gap between startups and corporations by helping to establish a collaborative framework for successful projects and relationships.

The platform acts as a forum for Open Innovation & Corporate Venturing, by enabling learning from innovative leaders within the local Industrial ecosystem. By connecting experts, through networking, executive education and industry events, corporate clients are able to share their venture client experiences and gather ideas, referrals and inspiration for their own innovation strategies. In short, the program is identifying and attracting talent from around the world and empowering established companies to innovate through collaboration with startups to improve the competitiveness of companies based in the Basque Country.

BIND 4.0 IMPACT FIGURES

Benefits from the BIND 4.0 Platform continue long after participation thanks to the experience and knowledge acquired and through the business connections established during our programs. BIND 4.0 not only facilitates a paid project with a reference client, but continues to open doors to new business opportunities. In fact, 78% of startups who participated in the BIND 4.0 SME Connection, were Acceleration Program Alumni. Meaning participation in one program, provides startups and scale ups easy access to a larger network of programs and potential clients.

Plus, our executive education and training sessions help Founders establish strategies and procedures, providing transferable skills for their next B2B relationships. Overall, startups double their income within one year of their graduation from the acceleration program, and the Industry 4.0 projects developed have generated over 7.7M€ in sales turnover so far.

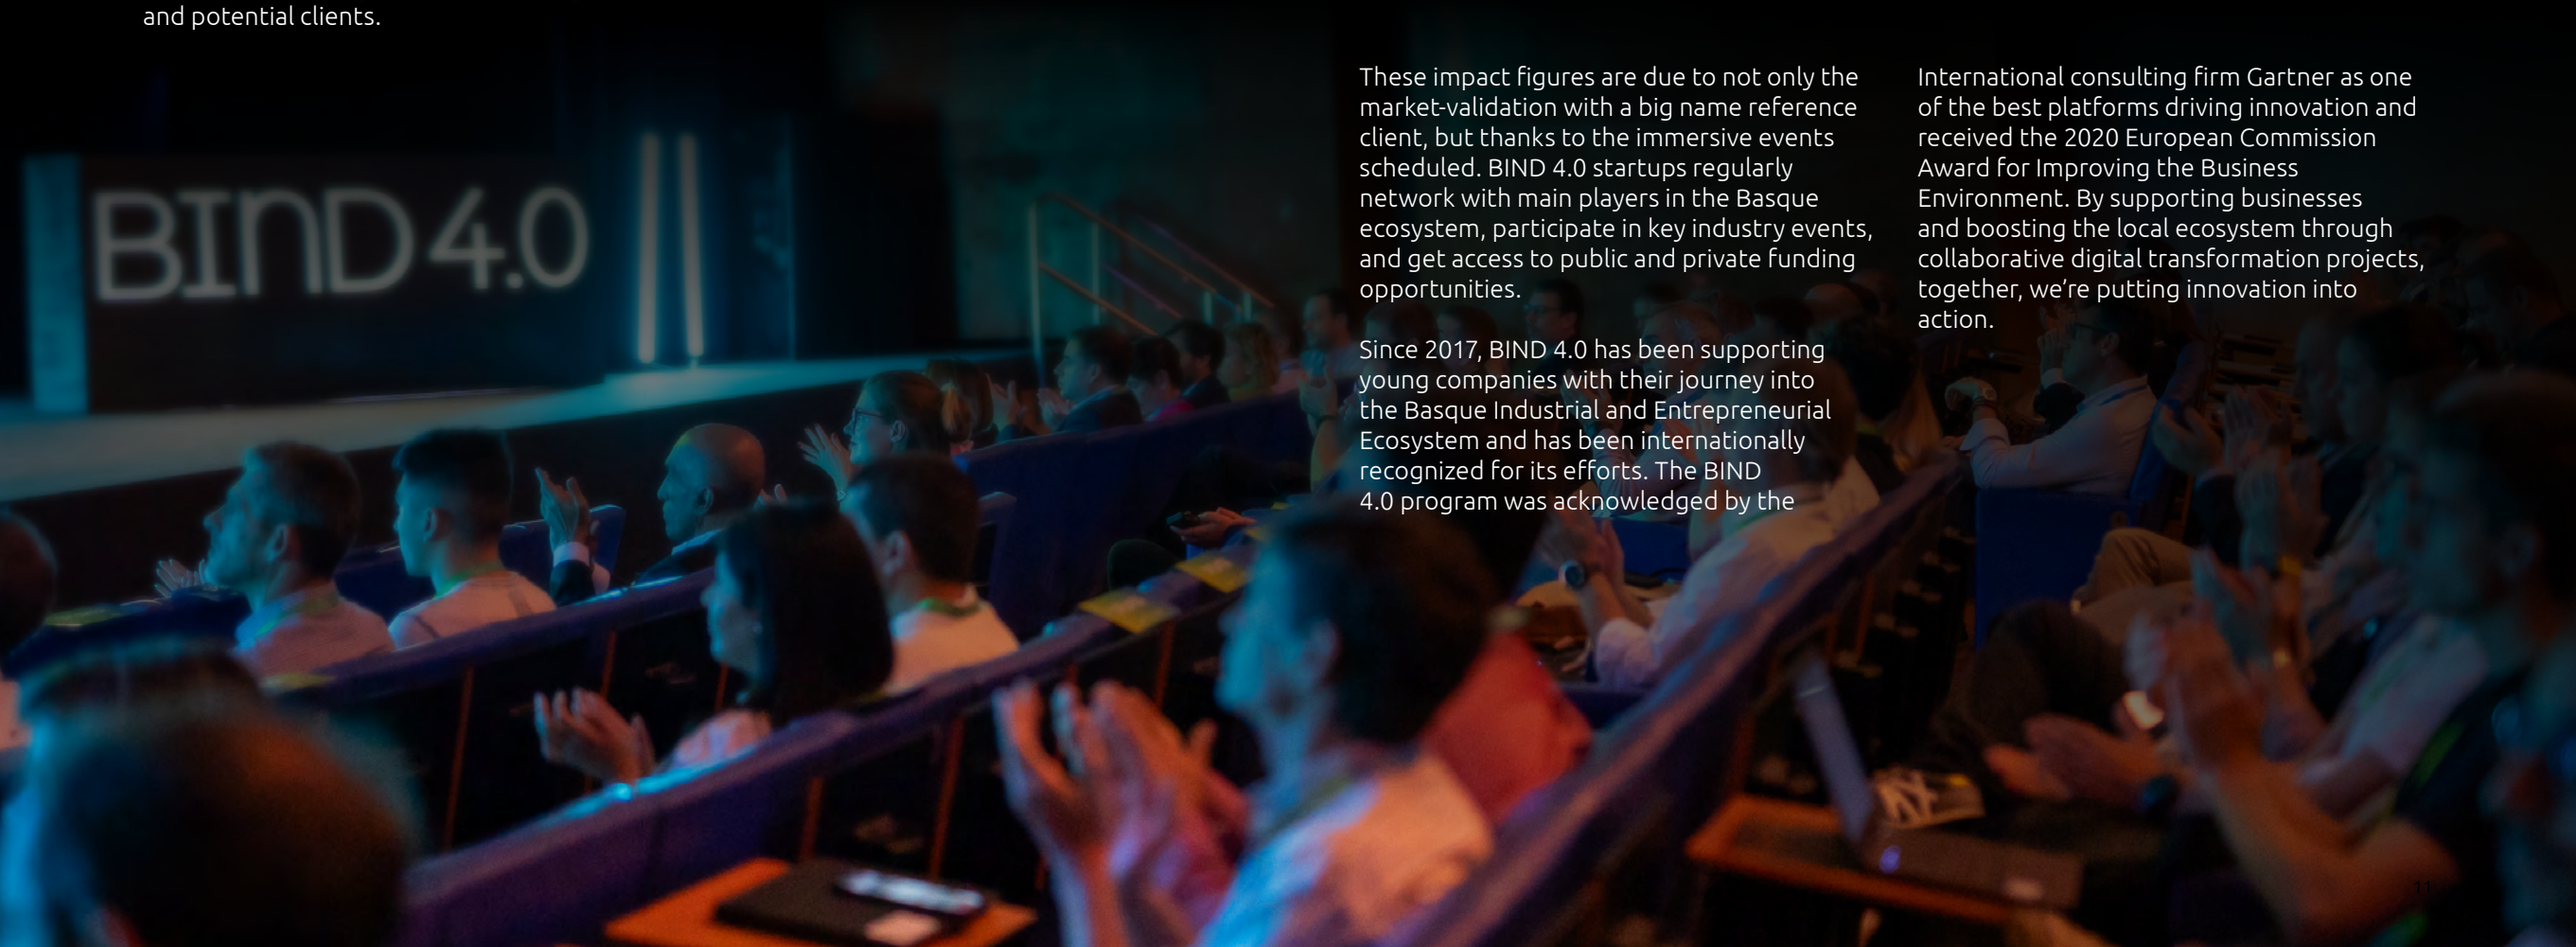
7.7M €
Real Turnover



These impact figures are due to not only the market-validation with a big name reference client, but thanks to the immersive events scheduled. BIND 4.0 startups regularly network with main players in the Basque ecosystem, participate in key industry events, and get access to public and private funding opportunities.

Since 2017, BIND 4.0 has been supporting young companies with their journey into the Basque Industrial and Entrepreneurial Ecosystem and has been internationally recognized for its efforts. The BIND 4.0 program was acknowledged by the International consulting firm Gartner as one of the best platforms driving innovation and received the 2020 European Commission Award for Improving the Business Environment. By supporting businesses and boosting the local ecosystem through collaborative digital transformation projects, together, we're putting innovation into action.

BASQUE ECOSYSTEM

There are so many reasons to choose the BIND 4.0 Platform, part of a larger public initiative promoting, attracting and investing in innovation and emerging technologies. One of the highest projected regions in Europe, and with over a century of Industrial activity and pioneering technology, the Basque Country is home to some of the world's most influential manufacturing companies. 100 International companies of reference have chosen to partner with BIND 4.0 and we are proud of the value we have generated in attracting top quality talent and promoting innovation in this region.

What's more, the Basque Country currently has more than 1,000 technology startups that have an estimated valuation of more than 1.5 billion euros. An ecosystem with differential public support, where more than 100 public and private agents work to establish the best environment for the birth, development and growth of innovative and/or technology-based companies. In 2022, the entire Basque ecosystem made available 800 programs, initiatives and instruments to support entrepreneurship, which represents a total budget of more than 96M€. BIND 4.0 is one of the many successful local initiatives designed to support and expand the Basque Advanced Industrial and Entrepreneurial networks.

Due its public-private structure, the BIND 4.0 Platform offers strong assurance in completing the goals set, by bringing together corporate companies and local government agencies, all part of a greater ecosystem committed to R&D & Innovation.

WHO IS BEHIND BIND 4.0?

Basque Government and the SPRI Group

BIND 4.0 is the Open Innovation Platform funded by the Basque Government and the SPRI Group, a business development agency where local companies find the tools with which to finance, launch, internationalize, locate industrial land and apply new technologies. In addition, the SPRI agency is commissioned by the Basque Government to attract and facilitate foreign investments from its “Invest in the Basque Country” initiative, helping to magnify the region as an industrial and entrepreneurial hub. Free workspaces are provided by the Basque Innovation Centers of Araba, Bizkaia and Gipuzkoa with additional support from Hazi and the Provincial Council of Gipuzkoa.

Technological Partners

We are grateful for our Technological Partners Microsoft, Siemens, Amazon Web Services and Oracle Web Services providing participating startups in the Acceleration Program with technology solutions valued at €20,000. In addition to their technological support, these partners have provided professional mentoring and industry visibility to the projects developed within the BIND 4.0 framework.

Venture Club

These are the esteemed investment firms that make up the BIND 4.0 Venture Club, providing access to specialized financing for Acceleration Program startup participants interested in funding. As part of our acceleration support services, BIND 4.0 organizes Investors Sessions, making introductions and providing startups with the opportunity to pitch to over 20 of Europe's leading venture capital firms.

Thanks To Our Partners

These well-respected companies have chosen to partner with the BIND 4.0 Platform to discover and contract disruptive tech startups in their pursuit and commitment to innovation. The Corporate Venture Clients in the Open Innovation & Acceleration Program, SMEs and Clusters from the SME Connection and the public companies that form BIND 4.0 GovTech are key players in the Basque Advanced Industrial Ecosystem.
